CILT, the National Centre for Languages recruits native speakers of French, Spanish and German to train to become qualified teachers of languages in schools in England. The Graduate Teacher Programme (GTP) is a unique and innovative teacher training initiative for modern languages. The Graduate Teacher Programme is an employment based initiative which enables graduates to train and qualify as teachers while they work in a secondary school (pupils aged 11-16) in England. 'On-the-job' training is carried out over the course of one academic year and is combined with professional duties in the school.

The CILT GTP is unique because it is the only GTP in England which solely recruits native speakers of French, Spanish and German, providing a training course specifically designed to meet their needs.

At the end of the Graduate Teacher Programme training year, successful trainees gain Qualified Teacher Status (QTS). This enables you to apply for work as a Newly Qualified Teacher (NQT) in England or Wales. It will not enable you to work as a qualified teacher in most other European Union countries.
