OFERTAS DE TRABAJO PARA GRADUADOS NACIONALES COMUNITARIOS.

El presente BOLETÍN es una selección de algunas de las ofertas que se difunden a través de EURES (European Employment Services), dirigidas a **cubrir vacantes que requieren formación universitaria, y las procedentes de centros universitarios europeos publicadas en la base de datos de EURES.**

Puede consultar estas ofertas y muchas más en EURES, El Portal Europeo de la Movilidad Profesional: eures.europa.eu

Información orientada a graduad@s en:

<http://ec.europa.eu/eures/main.jsp?lang=en&acro=job&catId=7576&parentId=52>

REQUISITOS IMPRESCINDIBLES: Es imprescindible al menos un nivel medio de conversación del **idioma** del país al que se quiera desplazar y, en cualquier caso, que permita desempeñar las tareas del puesto solicitado, así como la nacionalidad de un país del Espacio Económico europeo.

Las ofertas vienen distribuidas por países. Para solicitar el empleo, siga las instrucciones indicadas en cada oferta.

BÉLGICA:

Ph.D. on Tomographic Reconstruction

The Vision Lab at the University of Antwerp has an open position for a PhD student to work on image reconstruction in tomography. Tomography is an image reconstruction technique that leans strongly on large-scale numerical mathematics, particularly linear algebra. It has a wide range of applications in medicine (CT-scans), industry (nondestructive testing) and science (3D imaging of nanomaterials). This project focuses on the development of new computational techniques for combining image reconstruction and segmentation in a single step. Compared to the state-of-the-art, such methods can potentially yield far more accurate segmented reconstructions. Although the problem setting is motivated by tomography applications, the techniques developed in this project will be extended to more general inverse problems in imaging as well, in particular to Magnetic Resonance Imaging (MRI). The general theme of this project is fixed, but the plan of work is highly flexible and will be adjusted to the candidate's expertise and interests. Research group The Vision Lab is a research group of the physics department at the University of Antwerp. The Vision Lab has unique expertise in the development of algorithms for reconstruction, processing and analysis of tomographic imaging data. Application domains are X-ray Computed Tomography, Magnetic Resonance Imaging and Electron Tomography. The working environment is strongly interdisciplinary, combining techniques and insights from Physics, Mathematics and Computer Science. The group has a broad range of national and international collaborations with both academic and industrial partners. Recent research highlights include the development of tomography algorithms that enabled the first 3D reconstruction of a nanoparticle at atomic resolution (published in Nature) and the development of the FASTRA and FASTRA II desktop supercomputers for high-performance reconstruction. Requirements The candidate for this position should have at least a master degree in mathematics, physics, computer science or related fields, with a strong background in numerical mathematics, scientific computing and/or algorithm development. Excellent implementation skills in C++ and/or Matlab are important, as well as mastering the English language. Conditions of employment Enrolment will start as soon as possible. The Ph.D. student will be appointed for a period of four years; after the first year an evaluation will take place. You will form part of a world-class research environment with state-of-the-art instrumentation (see also <http://astra.ua.ac.be>). Contract type Four years; after the first year an evaluation will take place. Additional information Additional information about the vacancy can be obtained from: Prof. Dr. J. Sijbers, tel. +32 3 265 2464, Jan.Sijbers@ua.ac.be, University of Antwerp.

SOFTWARE DEVELOPER (H/F)

Le " Centre de Physique du Globe " de l'IRM, localisé à Dourbes (Viroinval), développe ses activités d'instrumentation géomagnétique dans le cadre du projet " Magnetic Valley ". Le (la) candidat(e) retenu(e) sera chargé(e), au sein de notre laboratoire mécatronique, du développement d'applications multi plate-forme (Windows et Linux) ainsi que du développement d'applications web liées aux divers projets en cours. IRM-CPG Information: Humbled François Address: rue du Centre de Physique 5670 Dourbes Phone: 060/39 54 24 Email: fhumbled@meteo.be

NUEVAS OFERTAS!!!

ALEMANIA:

TRABAJAR EN ALEMANIA

Recientemente han aparecido en la prensa diversas noticias relacionadas con la necesidad de personal en Alemania y dada la situación que padecemos en España son muchas las personas que se interesan por un trabajo en este país. Esto ha generado numerosas consultas en las oficinas de empleo y más especialmente en la red EURES, desde donde queremos aclarar ciertas informaciones :

A petición de Alemania se ha iniciado la colaboración entre los Servicios Públicos de Empleo de España y de Alemania, a través EURES-Alemania y EURES-España, para un proyecto de colaboración encaminado al reclutamiento de personal cualificado español para trabajar en Alemania.

Las áreas preferentes de reclutamiento son: Sanidad, Ingeniería, Docencia y Turismo-Hostelería. **Es necesario como mínimo un nivel intermedio de Alemán** ([B1/B2 del Marco Común Europeo de Referencia para las lenguas](#)).

Las personas interesadas en obtener información pueden dirigir un email con sus datos de contacto y sus características (en español y alemán) a la siguiente dirección de correo electrónico: grupo.eures.alemania@sepe.es indicando en el asunto del email la referencia que corresponda a su ámbito profesional:

Sanidad: RFA. EURES Sanidad-Alemania

Ingeniería: RFA. EURES Ingeniería-Alemania

Docencia: RFA. EURES Docencia-Alemania

Hostelería y Turismo: RFA. EURES Turismo y Hostelería-Alemania

No obstante, aquellas personas pertenecientes a otros dominios profesionales y con buenos conocimientos de alemán pueden escribir indicando en el asunto: RFA. EURES otros-Alemania.

En una primera fase del proyecto se elaborará una lista de personas interesadas. Posteriormente se contactará con ellas para analizar el casamiento de las ofertas y demandas de empleo.

CIENTÍFICO GESTOR DE COLECCIONES LÍTICAS- SCIENTIST/CURATOR

The National Research Centre on Human Evolution (CENIEH), located in Burgos (Spain), is interested in hiring a SCIENTIST / CURATOR. The Collections Area has the aim of cataloguing and managing the collections coming from excavations of archaeological and palaeontological sites. This area also takes care of maintaining the contextual information associated to the sites, ensuring easy access of researchers to the pieces forming part of their collections under the supervision of the Manager Curator, who reports directly to the Director. By this public call, the CENIEH offers a position as Scientist / Curator for lithic industry, on a full-time basis and expectedly starting on October 2011. This position of Researcher / Curator implies a double function: - As a researcher he must develop his own research line in the field of prehistoric archaeology within the Lithic Technology Programme according to the directives of the Programme Coordinator. - As a Curator of the Archaeological Collections of CENIEH, his main functions shall be: entering the materials in the Registry Book at the moment of their Deposit; leading the collections technicians in inventorying and cataloguing the materials of the corresponding collection; taking care of the documents of the collection under his responsibility and incorporating to them the results of the research works relating to the collection; establishing the priorities regarding the restoration or reintegration of collections under his responsibility based on technical restoration reports, scientific interest, etc...; closely cooperating with the Restoration Area of the centre in the reconstruction of highly damaged pieces which require precise technical knowledge of their original morphology; processing authorisations for consultations or loans of pieces, etc... Requirements: Doctor of History, Archaeology or Humanities. Research experience in the field of Prehistory. The candidate must have published scientific papers related to the field of prehistoric technology. Experience in the management of Palaeolithic collections and specifically relating to lithic materials. Managing and / or taking part in excavations of Palaeolithic sites, especially from the Pliocene and Pleistocene. Languages: High level of Spanish and Intermediate-advanced English. HOW TO APPLY: Via e-mail. Send a CV + your scientific project to develop your own research line + three references of scientists, researchers or managers you've worked with, with the reference COLEC 01/2011. / El Centro Nacional de Investigación sobre la Evolución Humana (CENIEH), ubicado en Burgos, tiene interés en contratar un CIENTÍFICO GESTOR DE COLECCIONES. El Área de Colecciones desarrolla, entre sus objetivos, la catalogación y gestión de las colecciones procedentes de excavaciones de yacimientos arqueológicos y paleontológicos. Por la presente convocatoria pública, el CENIEH ofrece una posición de Científico Gestor de Colecciones para las colecciones de Industria lítica, a tiempo completo con fecha de incorporación estimada para

octubre del 2011. Esta posición de Investigador Gestor de colecciones conlleva una doble función: como investigador debe desarrollar su propia línea de investigación en el campo de arqueología Prehistórica dentro del Programa de Tecnología Lítica bajo las directrices del Coordinador del Programa de Tecnología Lítica. Como Gestor de las colecciones arqueológicas del CENIEH debe inscribir los fondos en el Libro de Registro, responsabilizarse de la documentación de la colección a su cargo, establecer las prioridades en materia de restauración o reintegración de las colecciones, colaborar estrechamente con el Área de Restauración en la reconstrucción de piezas deterioradas, tramitar autorizaciones para consulta o prestamos de las piezas, etc. REQUISITOS: Doctorado en Historia, Arqueología o Humanidades, y experiencia tanto investigadora como en la gestión de colecciones paleolíticas. Nivel de inglés medio-alto. CÓMO SOLICITAR: Mandar por mail o correo el CV + Memoria explicando el proyecto científico que desarrollaría para su línea de investigación + Tres referencias de científicos/as o gestores relevantes en su investigación o colección, con referencia COLEC 01/2011. Responsable de RRHH Address: Consorcio CENIEH, Po.Sierra de Atapuerca, s/n. www.cenieh.es , 09002 Burgos, Spain Email: rrhh@cenieh.es

INFOTAINMENT ENGINEER

DUTIES: Planning for prototypes- and versions delivery of vehicle Software in order to the integration process; and coordination between the development-, testing- and validations centres. Analysis, clarification and definition of new design requirements. Validation of test results: electronic requirements, temperature, electromagnetic compatibility (EMC), MOST, HMI Integration, FLASH, etc. Contact with European concessionaires in Germany, UK and Italy. PROFILE: Professional Degree in Electronics or Telecommunications Engineering (or equivalent technical degree) with experience in Infotainment systems in Vehicle. SKILLS: Wide experience in vehicle communication systems (a MUST). Fluid English and /or German is a MUST. Excellent interpersonal and communications skills are required. Computer skills: Office (regular user), CAN-Bus System knowledge would be an advantage. SALARY/ GROSS/YEAR: IN ORDER TO THE PROFILE AND EXPERIENCE. spanish/english speaking technical consultant

We are looking for an Spanish and English speaking technical consultant who will work in one of our customer's service desk. The perfect candidate for this open position will be fluent in Spanish and English and have a great interest in computers and computer peripherals. It is not necessary that you have prior experience in the field but you need to have a thorough knowledge in computers and peripherals. You will be working with technical support concerning software and hardware on desktop and laptop computers. In this role

you will be a member of an EMEA support team with an ever changing work situation that demands high flexibility and stress tolerance. You strive for a very high level of service and you have great communication skills as well as great patience with customers. Requirements Spanish fluency, both in speech and writing. English fluency, both in speech and writing. Great interest in computers and computer peripherals. Desirable Prior experience in areas such as Windows XP, Office 2003, Outlook, desktop and laptop computers. Additional language skills can be meritorious. Application If you find this position interesting, apply through our E-recruitment system by following the appropriate link. Contact If you have any question [feel free to contact consultant manager Thomas Ingelström at 046-163424](#) or [consultant manager Andreas Täckholm at 046-163498](#)

Research engineer in advanced simulation technology

You probably think of SKF as the world leader in rolling bearings? Then you are right, because we are. Our high quality bearings have made us one of the most respected brands in the industrial world. But this is a limited picture of us. There are many other exciting dimensions to today's SKF. We have step by step evolved into a genuine knowledge engineering company. To strengthen this process, we have identified five different platforms that cover our technical knowledge and capabilities: Bearings and units, Seals, Mechatronics, Lubrication systems and Services. The SKF Engineering Research Centre is the Group's central product R&D facility. It is located in Nieuwegein, the Netherlands, with satellites in Bengaluru, India, and Gothenburg, Sweden, and has employees of many nationalities. As an employee of ERC, you are (in) the heart of our technology development activities that support SKF's business strategy and working in close co-operation with the operational units in the business. If you are challenged by the idea of developing your and SKF's knowledge, you are welcome to join us as a Research engineer in advanced simulation technology Keyword: PhD, MSc, licentiate, engineer, mechanical engineer, tribology, programming, C++, mathematics. Job profile In this position you will be part of a research and development team working with development of a state-of-the-art in-house simulation tool. The software is based on multi-body dynamics technology, including aspects of contact mechanics, reduction techniques, tribology, fatigue, etc. As a team member you will work in an international environment with close cooperation with research, product divisions and technical development centres around the world. You will have the opportunity to build and grow an SKF internal network, as well as an external network with suppliers, universities and third parties. The core of the job is to:

- be responsible for the technology area finite element and reduction techniques
- develop these into theories and algorithms, and
- implement these techniques in engineering software tools with C++

Your profile

- University degree, PhD or MSc with experience
- Analytically minded and able to apply theories on real mechanical problems
- Proficient in applied mathematics
- Good understanding of physical modelling, e.g., multi-body dynamics, FEM, contact mechanics
- Programming interest and skills in object oriented programming (C++)
- Strong focus on reaching targets and delivering results
- Project leader with networking skills
- Customer and business focus
- Self motivated, communicative team worker

Our offer

- A challenging job, with international contacts in a well-equipped R&D environment in a large successful company with excellent reputation
- Possibilities for professional growth
- A modern working environment

Location You will be located in Gothenburg, Sweden. To apply We would like you to enter your application on our web page: www.pafrekrytering.se or send by E-mail to [welcome.gbg@pafrekrytering.se](mailto:welcom.gbg@pafrekrytering.se).

UK:

SPANISH COMMUNITY MANAGER SEO WRITER

We require someone to help run a SPANISH girls website, part of a network. TASKS INCLUDE - working in website back-offices to upload material, oversee forum posts, manage a community of users, by being active on the websites, the social networks and answering emails, writing creative and SEO oriented texts on a regular basis, inline with strict content. requirements, translation of texts in your native language. BENEFITS A full training is provided on the first weeks. The employer has claimed an exception under the Equality Act 2010. You can apply for this job by sending a CV/written application to Damien Roux at Drimlike Ltd, job@drimlike.com.

MECHANICAL DESIGN ENGINEER

The candidate duties will be to design mechanical and hydraulic systems using Autocad and Solidworks, including mechanical and fluid calculation. The duties will also expand to project management for large offshore customers. Training is available. You can apply for this job by sending a CV/written application to Jerome Dardillac at Total Maintenance Engineering, Stargate Industrial Estate, Ryton, Ryton, Tyne & Wear, NE40 3EX or to jdardillac@tmehydraulics.co.uk.

SPEECH RESEARCH APPLICATIONS ENGINEER

Speech technology engineer to work on the development of HMM-based TTS and ASR systems. Full-time position for 1 year. Key skills:- Good knowledge of HMMs for speech synthesis and/or speech recognition - Good software programming skills in C and Pyt. How to apply: You can apply for this job by sending a CV/written application to Kate Knill at Toshiba Research Europe Ltd, kate.knill@crl.toshiba.co.uk.

RGN FULL TIME

RNA or RGN Level 1 required. 1st Level Nurse required to work full at our Nursing Home. Duties include assessing, planning implementing appropriate programmes of nursing standards, carrying out nursing procedures and treatments, including administration of medicines and controlled drugs according to the Home standards and NMC guidelines. Successful applicants will be required to hold a current PIN number. Successful applicants are required to provide an enhanced disclosure. Disclosure expense will be met by employer. To register as a nurse or midwife in the UK visit <http://www.nmc-uk.org>. To register as a nurse or midwife in the UK visit <http://www.nmc-uk.org>. Pension available. You can apply for this job by visiting www.fordepark.co.uk and following the instructions on the webpage.

Postdoctoral Research Assistant

A position is available in the network programme Systems Biology of T-cell activation Sybilla. Its aim is to understand T-cell biology and pathology using proteomics, transcriptomics, high-resolution dynamic imaging, and mathematical and computer modelling. You will collaborate with labs in the Sybilla consortium and attend regular meetings to present work.. The project aims to understand mechanisms controlling T-cell activation and differentiation. In particular quantitative mass spectrometry will be used to investigate

proteome changes in antigen receptor-activated T-cells. A new approach QUANTCAT will be used to isolate and quantify newly synthesised proteins, evaluate regulation of protein expression and compare proteomics data with RNA data generated by a collaborating lab. You must have a PhD or equivalent.. You can apply for this job by sending a CV/written application to Ameila Molloy Bland at Sir William Dunn School of Pathology, administration@path.ox.ac.uk

Información del Graduate Teacher Programme:

<http://www.britishcouncil.org/learning-graduate-teacher-programme.htm>

CILT, the National Centre for Languages recruits native speakers of French, Spanish and German to train to become qualified teachers of languages in schools in England. The Graduate Teacher Programme (GTP) is a unique and innovative teacher training initiative for modern languages. The Graduate Teacher Programme is an employment based initiative which enables graduates to train and qualify as teachers while they work in a secondary school (pupils aged 11-16) in England. 'On-the-job' training is carried out over the course of one academic year and is combined with professional duties in the school.

The CILT GTP is unique because it is the only GTP in England which solely recruits native speakers of French, Spanish and German, providing a training course specifically designed to meet their needs.

At the end of the Graduate Teacher Programme training year, successful trainees gain Qualified Teacher Status (QTS). This enables you to apply for work as a Newly Qualified Teacher (NQT) in England or Wales. It will not enable you to work as a qualified teacher in most other European Union countries.
