

System Administrator Intern

Reporting to: CTO and/ Cloud Engineer

Hours: Full Time

Duration: 5-6 months

Start: January/February 2019

Location: Brussels, Belgium

Optimy has developed an innovative and intuitive Software as a Service (SaaS) that allows organisations to better manage their sponsorship, grants and community investment.

After 6 years, Optimy records more than 230 customers across 6 continents. More than 98% of Optimy users renew their licence each year, including BMW, Carrefour, Johnson&Johnson, L'Oréal, Vodafone, Holcim and Volkswagen.

Optimy aims to become the leader worldwide in its niche market and is looking for a System Administrator Intern to actively participate in maintaining and developing the IT Cloud infrastructure.

Please note that we will accept only applicants who can provide us with an internship agreement from their university.

Responsibilities:

- Work on real server infrastructures with cutting-edge technology
- Setup monitoring tools (network,server,applications)
- Set up Infrastructure as code (Using terraform)
- Assist in installing and configuring operating systems and company applications
- Participate in all ad-hoc sysadmin related projects
- Help on troubleshooting system and network problems

Requirements:

- You're comfortable with the Linux Shell
- You have a good knowledge of network environments
- You're a self-learner and passionate about technology
- You're work-proficient level in English and/OR French
- Knowledge of Cloud providers is desirable
- You have a good knowledge of Windows environments (OSX is a plus!)

Our offer:

- A real job experience, you won't stand at the copy machine!
- A young and dynamic work environment
- A chance to work as part of an international team in a SaaS company
- As a contribution we grant 300€/month to all foreign and Belgian students.
