Optimisation is an important tool across all fields of quantitative research. You will learn:

- how to formulate a problem
- when you can be sure that you will find an optimal solution to your problem
- how to solve an optimisation problem with a computer
- how to visualise problems and solutions with a computer

Module 1
1-6 July 2019
Digital boot camp

Module 2
8-13 July 2019
Optimisation: Theory and Practice

Module 3
5-11 February 2020
Advanced Applications in Optimisation

Università
della
Svizzera
italiana
