

Marie Curie post doc candidates offer related to microfluidics for positions in 2017 into French innovative companies.

We are looking for post doc candidates to collaborate and submit with us a prestigious Marie Curie Individual Fellowship application (base salary: 4000 euros/month after tax). This fellowship would lead to a 2 years post doctorate contract to perform cutting-edge research in a young innovative French company in Paris while learning business and entrepreneurship skills.

Applicants can contact us with their own project idea or to collaborate on one of our projects within the following themes:

Organ on a chip, lab on a chip, Micro-PCR, microfluidic instruments for cell biology research, microfluidic cell culture and drug screening, microfabrication.

Guilhem Velvé Casquillas, Phd  
CEO ELVESYS SAS
