

PhD POSITION

in Brain MRI

We offer a 4-year funded PhD position. The PhD student will work on the analysis of brain MRI and its application to brain pathologies.

Looking for an enthusiastic student who has a strong interest in neuroimaging. The candidate should have Master's (or equivalent) degree in Engineering (e.g., Biomedical, Telecommunications, Electrical, Electronics), Computer Science, Mathematics, Physics, Neuroscience, and/or related areas.

Other desirable skills are:

- Good programming knowledge in Python, R, or Matlab.
- Experience in neuroimaging research, particularly with MRI
- Knowledge of statistics.
- Previous experience with signal and image processing, machine learning or deep learning tools.

Position associated with the MCIN. Official call expected for January 2023. Before applying, interested candidates are strongly encouraged to contact the PI. The LPI team will support potential candidates within the application process.

The contract will start in 2023.
