Hohenheim Summer School 2026

**ECONOMICS OF CLIMATE CHANGE:
MANAGING, MITIGATING, MODERATING**

wiso.uni-hohenheim.de/summerschool

JOIN THE HOHENHEIM SUMMER SCHOOL 2026!

The Economics of Climate Change summer school explores how economic thinking can guide effective responses to one of the defining challenges of our time. Participants will learn how markets, incentives, and policy instruments shape climate outcomes. The programme bridges global and local perspectives and considers the roles of diverse stakeholders, including businesses, policymakers, and civil society. Combining theory, empirical evidence, and field trips, the summer school prepares future economists and decision-makers to design strategies for managing, mitigating, and mobilising responses to climate change.
