Nueva versión de la herramienta ALCE en PoliformaT

Ya se encuentra disponible en poliformat PoliformaT la nueva versión de la herramienta ALCE, que facilita la corrección de exámenes tipo TEST realizados en papel.

Esta actualización tecnológica garantiza las condiciones de seguridad y servicio de la herramienta y, adicionalmente, incorpora algunas mejoras que ayudan en el flujo de trabajo de la corrección. Por ejemplo, en la nueva versión, la corrección se realiza en los servidores de la UPV (ya no se realiza sobre el ordenador del docente), lo que, además de proporcionar mayor seguridad y capacidad de cómputo, permite que se pueda iniciar el proceso de corrección en un ordenador y, posteriormente, continuar el flujo de corrección desde cualquier otro (en casa, en el despacho, etc...). En caso de que un problema afecte al ordenador del docente, la seguridad e integridad del examen quedará garantizada, ya que toda la información reside en los servidores de la UPV.

Se trata de una adaptación tecnológica compleja, por lo que durante el curso pasado la nueva herramienta fue revisada y probada en varias experiencias piloto para comprobar la fiabilidad de la misma.

En este momento consideramos que la aplicación es suficientemente estable. Sin embargo, **al ser una aplicación que requiere del uso de medios físicos (impresoras, papeles y escáner), el éxito en su uso depende en gran medida de seguir adecuadamente las instrucciones en la confección de la plantilla y en el uso de impresoras y escáneres adecuados.** Por ello, en esta versión, se ha incorporado la opción de validar la plantilla antes del examen, para minimizar los problemas que estos medios físicos puedan causar.

Dispones de toda la información necesaria en la [wiki de la aplicación ALCE](#).

Si tienes dudas o problemas puedes ponerte en contacto con el CAU en <https://cau.upv.es>, donde contestarán a tus dudas y, si es necesario, serás transferido a un gestor especializado en la herramienta que revisará tus requerimientos
